

Evaluation of USSR Area Program:

1. I feel that this type of area program can be useful in increasing analyst effectiveness only if more effort is made to reach those who can benefit from the program and who are able to attend regularly.

2. The lectures which I attended on economic planning in the USSR were useful in that they gave me background material in the field.

3. a. The content of the subject matter was in general relevant to my work problem but somewhat too specific.

b. The method of presentation was satisfactory.

c. The time allotted was satisfactory.

d. I feel that there could have been more discussion in this particular series (economic planning in USSR) and favor a part of each period for discussion.

4. I feel it would be reasonable and useful for the students to do a small amount of collateral reading to insure more active participation and more complete comprehension of the material presented.
